

Wind forecasts preceding the start of the race indicated that the race would be easy and difficult at the same time. Easy, because the direction of the wind predicted a straight sailing from mark to mark without tacks.

Difficult because all will sail almost the same and it will be hard to get any advantage. The biggest differences of routes were on the second leg between "**Niagara Lighted Buoy 2**" and "**Burlington Weather Buoy**".

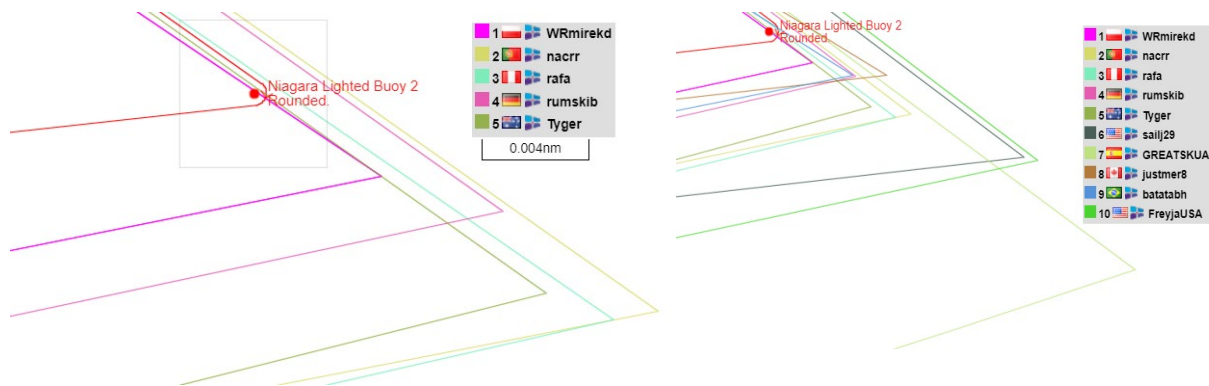

I focused on precise, but without risk, rounding the marks and carefully planning the route. This time it worked brilliantly and after the first mark I managed to take the lead. The rest of the race looked as follows. 😊😊😊.

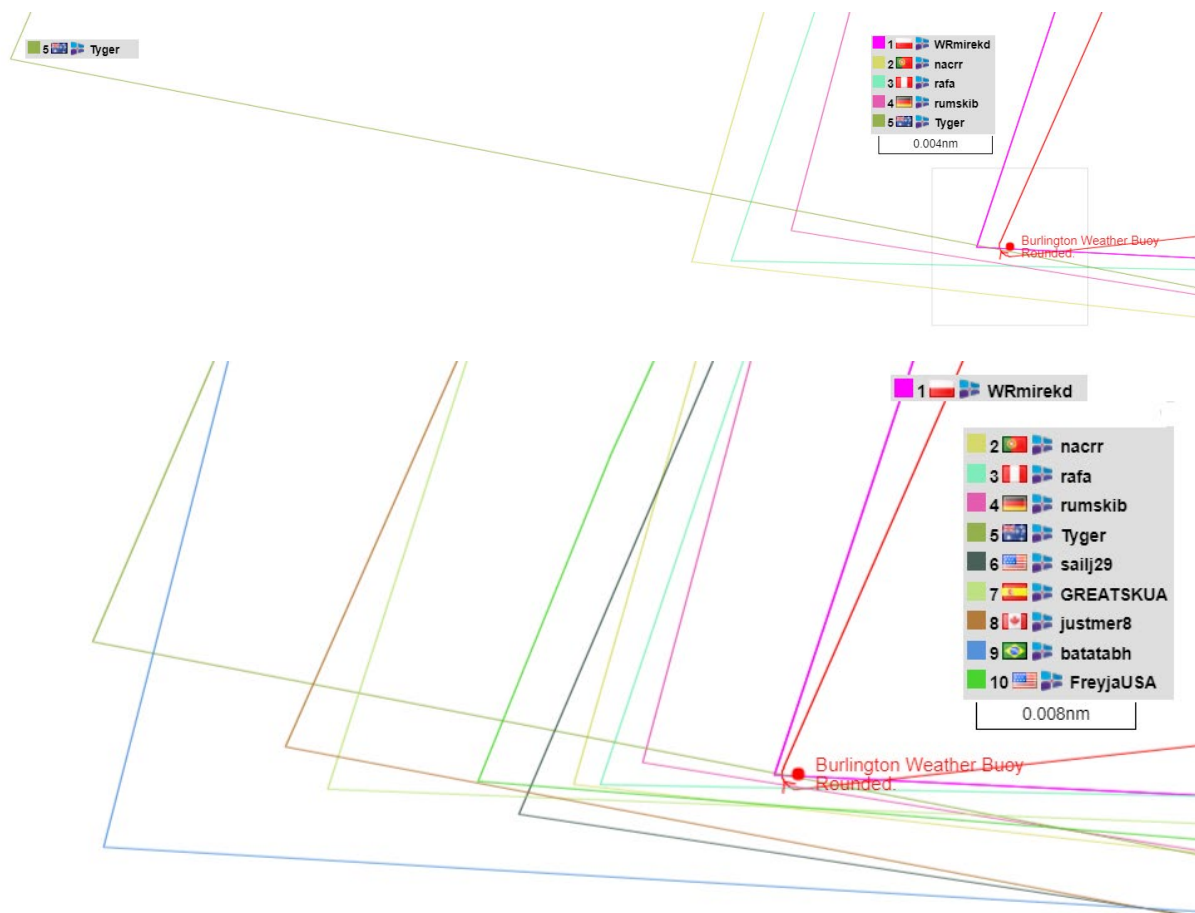

It worked, they didn't catch me!

Let's see what the rounding of marks looked like.

And the second mark.

I present the top 5 and the TOP 10, but I checked all 76 boats who finished the race and no one managed to round the marks better.

And finally, the TOP 10 ranking.

The list was closed after 1m 47s.

Interesting and a bit stressful race.
